#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **Detailed Action**

1). The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2.) Claims 1-29 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Independent claim 1 has been amended to specify that the transmitter transmits a signal “at a frequency within an extremely low radio frequency (ELF) range”. Independent claims 13, 19, and 25 have been amended to include limitations directed to a low frequency signal. These new limitations in the amended claims directed to extremely low frequency signals or to low frequency signals constitute new matter not supported by the original specification. The original specification makes no mention of low frequency signals used to transmit control data in the manner claimed. In the original specification, the transmitter associated with the welding control transmits a single pulse each time the human operator depresses the torch trigger. This single pulse encodes control information in its pulse width and its pulse height ; the range of permissible pulse widths has been chosen to accommodate the degrading effects of weld cable impedance (see paragraph 0029). There is no mention of a low frequency, and especially of an extremely low radio frequency, to transmit control data in the original specification.

3.) Applicant's remarks in the amendment filed on 4/25/2005 have been given careful consideration, but are not persuasive of patentability. The amended claims are considered to contain new matter as discussed above. Applicant is advised that if his response to the new matter rejection is to simply remove the new matter, the claims will be subject to the rejections based on prior art as set forth in previous Office actions.

Any inquiry concerning this communication should be directed to Clifford C Shaw at telephone number 571-272-1182. The examiner can normally be reached on Monday through Friday of the first week of the pay period and on Tuesday through Friday of the second week of the pay period.
